

## Technology Leadership Begins with an IT Roadmap

### Empower your team with the right technology.

At Xantrion we know the foundation of a great organization begins with a commitment to your clients. Your employees' desire to perfect the presentation, make the flight to the client meeting, and put their reputation on the line to face business challenges is central to that commitment. We promise to deliver technology leadership and fully vetted IT solutions that empower your success today and for years to come.

The Xantrion IT Roadmap™ is more than a business engagement formality—it's the cornerstone of a partnership where the intersection of business goals and technology is defined, documented, and iterated for improvement over time. Your technology investment should empower your team to innovate, grow, and succeed—Xantrion will build the roadmap and execute the plan to get you there.

#### Infrastructure assessment and documentation—your technology understood

- Desktop, infrastructure, and cloud assessment
- IT process and procedure review; user support survey
- Equipment and operating costs assessment
- Current technology and vendor documentation

#### Security, productivity, and flexibility—secure and empower your team

- Branch office and mobile work force strategy review
- Disaster preparedness and business continuity audit
- Privacy and data security assessment
- Industry compliance profile review
- Infrastructure and technology use profile

#### Technology leadership—planning for where your company needs to be

- Experienced CIO-level leadership, vision, and planning
- IT team recommendations
- Mobile, cloud, and security trends research and analysis
- Industry-specific software, hardware, and services recommendation
- Partner, vendor, and overall technology decision support

Xantrion is the technology leadership partner that sets your company apart.
