

## Empower Your Mobile Workforce

### Extend the reach of your business.

From a new branch office in Asia to employees on the go at the airport, Xantrion designs and manages technology solutions that provide maximum security and flexibility for your organization. Managed Mobility allows your team to work anywhere, using almost any device seamlessly and securely, and our CIO-driven model delivers technology leadership and mobility solutions for your company now and for years to come.

### Remote offices and employees.

- Connect branch and corporate offices seamlessly - locally, nationally, globally
- Increase productivity with remote audio, messaging, and video presence solutions
- Capitalize on the latest virtual desktop technologies
- Leverage best practices, training, and acceptable use policies

### Secure mobile data and devices.

- Develop a secure bring-your-own-device strategy
- Enable team members to use preferred devices and operating systems
- Provide privacy, security, and compliance solutions
- Count on data control and auditing strategies to keep information secure and compliant

### Stay current.

- Research new devices and applications
- Evaluate hardware and software partners
- Align technology investments and initiatives with business goals
- Develop and maintain a mobile technology roadmap for your company

Maximize your flexibility and mobility without compromising security.
