

Rest Easy—You’re Not a Defenseless Target

Expect risk management tailored to mid-sized businesses.

Don’t fall prey to increasingly frequent and sophisticated cyberattacks. Implement Xantrion Managed Security,™ a turnkey, comprehensive cybersecurity program that significantly reduces the likelihood of a breach.

Xantrion Managed Security includes more than just state-of-the-art technology, it also provides security awareness training, stringent practices and standards, and a team of experts to identify and fix security vulnerabilities. We take a risk-based approach to cybersecurity, ensuring the best available protection is provided within a sensible budget. We’ve refined this approach over more than a decade of protecting mid-sized businesses from cyberthreats.

Count on an audit-ready cybersecurity program.

Organizations facing regulatory, investor, board, or customer review, not only need to protect their business but also prove due diligence. With Xantrion Managed Security, auditors can easily confirm that regulatory, and other key requirements, are satisfied.
