

Don't Let a Disaster Derail Your Business

Preparation is the best protection.

Xantrion Managed Continuity keeps your organization operating smoothly in the face of major disruptions. Using a risk-based methodology, we provide a customized suite of data protection, disaster avoidance, and disaster recovery services designed to meet your budgetary and business goals.

Disaster avoidance

Reduce your risks.

Host your systems in the Xantrion Managed Cloud located in Denver, with failover to our Managed Cloud in Salt Lake City

Keep servers, applications, and data out of harm's way

Protect your data from hardware failure, power loss, sprinkler and HVAC malfunctions, fire, flood, earthquake, and building closure

Disaster recovery

Get back to business quickly.

Plan development and implementation

Scheduled testing and documentation management

High redundancy and reliable failover

Designate a restoration location, either one of your locations or the Xantrion Managed Cloud

Data replication options from periodic snapshots to transaction-level granularity

Ensure you meet recovery time and data restoration requirements

Prevent data loss, ensure a high level of operational continuity, and recover quickly in the event of a disaster.
