

## IT as it Should Be—Completely Managed

### Keep your business running at full speed.

For a fixed monthly fee, we assume complete responsibility for the reliable, secure operation of your IT infrastructure. Xantrion Complete Care provides a comprehensive suite of services, including network planning, design, and implementation, user support, and security management. We ensure your employees can do their best work in the office or on the road.

With Complete Care, you'll never see extra charges for on-site support, after-hours emergencies, or system upgrades. If you need help, call us 24x7. We'll answer the phone immediately and have an engineer at your offices in two hours or less if necessary.

### Put your IT infrastructure in the hands of trusted experts.

Let trusted experts take IT off your plate and lead technology initiatives.

Count on a predictable IT budget with an affordable fixed monthly cost.

Benefit from the Xantrion Technology Platform,<sup>™</sup> a combination of fully vetted technology solutions and configuration best practices that maximize infrastructure performance.

Count on the Xantrion Managed Service Standard,<sup>™</sup> a compilation of IT support practices that increase end-user satisfaction while reducing costs.

Handle all technology issues through a single point of contact.

Protect your information assets with security management.

Easily manage growth and geographic expansion.

With fully vetted solutions, adherence to best practices, and proactive monitoring and maintenance, we do more than keep an eye on your network. We manage it.
