

2020 Cybersecurity and Threat Preparedness Annual Study

Survey conducted by ResearchCorp.org, sponsored by Xantrion

Worried about a phishing or brute-force attack resulting in a cryptolocker or funds transfer fraud incident?
You are not alone.

Only 14% of companies surveyed have strong confidence in the effectiveness of their security measures.

Is your organization making the grade?

Security Measures in Place as % of Respondents

PARTICIPANT PROFILE

The survey participants hold leadership management positions in organizations with 50-250 employees. All of these businesses require secure and efficient technology tools and infrastructures to support growth and success.

RESEARCH METHODOLOGY

Participants were asked multiple-choice and open-ended questions regarding their technology usage and infrastructure including current and future planning, and preferred systems and platforms deployed in an effort to learn about their business challenges, concerns, and priorities for technology services.

ABOUT RESEARCHCORP.ORG

ResearchCorp.org specializes in technology-related research and uses a time-tested process to ensure those surveyed will provide meaningful data and industry insights.

ABOUT XANTRION

Xantrion is a leading managed services security provider (MSSP) headquartered in Oakland, California, delivering cybersecurity and IT support for midsized security-conscious organizations in the United States.
